

JOURNAL OF THE SOCIETY OF DYERS AND COLOURISTS

Volume 111 1995 Index

Subject Index

- 1-naphthylamine**, substitutes for – a comparative study 390
- 1:2 metal-complex dyes**, for leather 199
- 5-acetamidoaniline-2-sulphonic acid**, as a substitute for 1-naphthylamine 390
- Abstracts**, analysis and testing 49, 88, 123, 168, 207, 253, 335, 364
ancillary processes 46, 87, 120, 167, 206, 251, 252, 301, 334, 362, 395
chemicals 43, 86, 164, 204, 250, 300, 333, 394
dyeing – theory and practice, 43, 86, 119, 165, 204, 251, 300, 333, 362, 395
dyes and pigments 42, 85, 118, 164, 204, 250, 300, 332, 361, 394
fibres and polymers 124, 208, 254, 336, 364
health and safety, 45, 86, 120, 166, 205, 251, 301, 362, 395
list of periodicals abstracted 396
miscellaneous 208, 255, 336
non-textile coloration 124, 208, 254, 336
physico-chemical aspects of colour 123, 207, 253, 335, 364
plant, management and services 47, 88, 122, 168, 207, 253, 302, 334, 363
printing – theory and practice 45, 87, 120, 166, 205, 251, 301, 334, 395
- Acid dyes**, coloration of polypropylene fibres 159
- Acrylic fibres**, effect of carriers on dyeing 107
plasticisation and thermal characterisation 328
- Alkaline hydrolysis**, to release reactive dyes from wool fibres 100
- Anionic trivalent chromium complexes**, as mordants in chrome dyeing 316
- Anthraquinone disperse dyes**, with phosphatidylcholine/cholesterol liposomes as vehicles in wool dyeing 30
- Aramid fabrics**, dyed, effect of sputter etching on colour 111
effect of sputter etching on surface characteristics 72
- Azo colorants**, ETAD response to German ban 96
- derived from pyrazolone – crystal structures 66
- oil-soluble dyes for silver dye-bleach photography 190
- Basolan AS**, a new wool dyeing process 228
- Book reviews**, A strategic review of world textile companies 298
Analytical chemistry of synthetic colorants, Vol 2 115
Biodegradability of surfactants 247
Cancer and workplace chemicals 248
Chemistry of the textiles industry 298
Colour art and science 299
Dye plants and dyeing 116
Modern colourants: synthesis and structure, volume 3 203
Practical colour measurement – a primer for the beginner, a reminder for the expert 359
Water use and reuse 116
- BS EN ISO 9000**, help or hindrance in a small textile company? 223
- Business news**, Alko Ltd Biotechnology becomes Primalco Ltd Biotec 128
Beck & Politzer packs more colours for Zeneca 306
coatings profits down again 340
Carrington Viyella: London office 92
CTC-Eurodye merger 211
DTI reviews status of NAMAS and NACCB 92
DTI consults on chemical weapons convention 92
dyehouse automation system 54
European Colour: a successful year 258
European Colour acquires Dyecome business from Ciba Geigy 128
EDANA, Europe's nonwovens association – news 306
garment initiative 340
Italian express service 3
Moenus group now part of Deutsche Babcock 128
new Woolmark fees 54
Orwak waste compactors reduce Town End's disposal costs 171
raw material cost increases for paint and printing ink producers 170
Silk industries plc to float 211
- Sumitomo chemicals achieve BS EN ISO 9002 258
threat to European chemicals industry 128
X-Rite completes acquisition of Labsphere 211
- Carriers**, effect on dyeing of an acrylic fibre 107
- Cationic protein hydrolysate**, and sodium sulphite – effect on wool 281
- Cations**, effect of polycation on light fastness of CI Acid Red 249 311
tetrazonium – reaction with wool keratin 77
- Cellulosics**, dynamic response – process optimisation in exhaust dyeing 135
influence of liquor ratio on jet dyeing of cellulose fibres using monochlorotriazine reactive dyes 19
printing, current and future demands on the reactive dye printer 4
use of ultrasonic energy in reactive dyeing 279
- Chemical selectivity**, of reactive dyes on cotton, homogeneous models 288
- China**, textile industry – threat or investment opportunity 98
- Chrome dyeing**, using anionic trivalent chromium complexes as mordants 316
- Chromophores**, in wool keratin, photolytic production 345
- Chromotropic acid**, disodium salt, polyester dyeing with derived disazo dyes 349
- CI Acid Red 249**, effect of polycation on light fastness 311
- CI Acid Violet 48**, effects of amino acid dissociation constants on rate of dyeing of wool 22
- CIE 94**, comparison with CMC equation 380
description 376
- Cold pad-batch method**, wet-on-wet, for application of reactive dyes to cotton 187
- Coloration of glass**, sol-gel coloured coating 150
- Colour**, change sensitivity, of dye recipes 237

Colour (Contd)

difference formulae 267, 376, 380
dynamic response to specifications 142
effect of moisture content of wool on appearance after dyeing 285
in graphics 308
measurement by video camera 373
Museum, future of 94
Professional Communicator 56
range management 272
selector 56
specifications, dynamic response 142
sputter etching of dyed aramid fabrics 111
virtual specification 260

Colour-difference formulae, CIE 94

376, 380
recent developments 267

Colouring matters 2, 54, 90, 126, 169, 210, 258, 305, 340

Comment, A time to remember – a time to celebrate 257

Free tuition for ASDC students 209
German amine regulations, 53
Publish and be damned 89
So you think you can manage a dyehouse? 125
SDC International Conference 1994, 1
Where now – what next 337
You out there – speak up! 365

Consumer affairs, Satisfying the textile consumer, 212

Consumption, world cotton trends 341 synthetic textured yarn, market set for global growth 224

Continuous dyeing, on-line colorimetry in 139

Cotton, application of reactive dyes by a wet-on-wet cold pad-batch method 187
dyeing properties of fibres treated with liquid ammonia 154
homogeneous models for the chemical selectivity of reactive dyes 288
world price and consumption trends 341

Crosslinking agents for level fast dyeing of wool with nucleophilic aminoalkyl dyes, bifunctional 385 trifunctional 12

Crystal, structures of azo colorants derived from pyrazolone 66
violet lactone – improving the light-fastness of 323

Decorative arts, Norwich shawl industry 275

pigments and the artist's palette 368

Degumming, partial, of raw mulberry silk 245

Descaling, enzymatic, of wool fibres 352

Disazo dyes derived from the disodium salt of chromotropic acid, dyeing of polyester and its blends with them and their chelates with transition metal ions 349

Disodium salt of chromotropic acid, polyester dyeing with derived disazo dyes 349

Disperse dyes, anthraquinone, with phosphatidylcholine/cholesterol liposomes as vehicles in wool dyeing 30

Dye pick-up, of wool, increased due to the Maillard reaction 293

Dyeing, acrylic fibre, efficiency of carriers 107

cellulosics, reactive with ultrasonic energy 279

chrome, using anionic trivalent chromium complexes as mordants 316

continuous, on-line colorimetry 139

cellulose, exhaust – process optimisation 135

cellulose fibres, jet – influence of liquor ratio with monochlorotriazine reactive dyes 19

cotton, properties of fibres treated with liquid ammonia 154

environmental challenge of 182

Merlin Dyeing and Finishing 58

polyester and its blends, with disazo dyes derived from the disodium salt of chromotropic acid and their chelates with transition metal ions 349

silk, low temperature ultrasonic 342

silk, with sulphatoethylsulphone dyes 146

wool, effects of amino acid dissociation constants on rate of dyeing with CI Acid Violet 48 22

wool, level fast with nucleophilic aminoalkyl dyes and crosslinking agents 12, 385

wool, methods and reflectance measurements 285

wool, using Basolan AS process 228

wool, with phosphatidylcholine/cholesterol liposomes as vehicles for anthraquinone disperse dyes 30

Dyeing machinery manufacturing industry, trends in strategy and dynamic response 135

Dyes, 1:2 metal complex for leather, simultaneous multiwavelength spectrophotometric determination 199

acid, coloration of polypropylene fibres 159

anthraquinone disperse, phosphatidylcholine/cholesterol colour change sensitivity of recipes 237
comparative study of monoazo anionic dyes from 5-acetamidodaniline-2-sulphonic acid and 1-naphthylamine (substitutes for 1-naphthylamine. Part 1) 390

disazo derived from the disodium salt of chromotropic acid – dyeing of polyester and its blends with them and their chelates with transition metal ions 349

haloacetyl reactive – synthesis and application to silk 195

liposomes as vehicles in wool dyeing 30
monochlorotriazine reactive dyes – influence of liquor ratio on jet dyeing of cellulose fibres 19

mordanted and metal salts, protection against phototendering of wool 130
nucleophilic aminoalkyl and crosslinking agents, for level fast dyeing of wool 12, 385

oil-soluble azo, for silver dye-bleach photography 190

reactive, application to cotton by a wet-on-wet cold pad-batch method 187

reactive, models for chemical selectivity on cotton 288

reactive, release from wool fibres by alkaline hydrolysis and analysis by thin layer chromatography 100
reactive haloacetyl – synthesis and application to silk 195

sulphatoethylsulphone – a new approach to the dyeing of silk 146
sulphur and the environment 172

Dynamic response, on-line colorimetry in continuous dyeing 139

process optimisation in the exhaust dyeing of cellulose 135

SDC International Conference 1994 1

to colour specifications 142
trends in the dyeing machinery manufacturing industry 135

Enhanced lustre, of wool fibres through enzymatic descaling 352

Environment, ETAD response to German azo colorant ban 96

dyeing as an environmental challenge 182

Hong Kong textile industry 176

SDC 1994 International Conference 1
sulphur dyes 172

textile printing products 7
waste water treatment 179

Environmental news 55, 306, 340

Enzymatic descaling, of wool fibres 352

Erratum, To J.S.D.C., 109 (1994)

pp. 300–304 177

ETAD, response to German azo colorant ban 96

Evaluation of whiteness, instrumental 263

Examinations, papers for the associateship (ASDC), 1994 50
report of the board 39

Exhaust dyeing, of cellulose – process optimisation 135

Fluorescence, and photolytic production of chromophores in wool keratin 345

Fluorination, wool pretreatment for shrink resistance 63

Fourier transform infra-red spectroscopy (FTIR), to investigate modifications to wool treated with sodium sulphite and cationic protein hydrolysate 281

Glass coloration, with sol-gel coloured coating 150

Graft polymerisation, of vinyl monomers to wool 80

Graphics, colour in 308

Haloacetyl reactive dyes, synthesis and application to silk 195

Health and safety 2, 3, 90, 91, 92, 128, 307

Hong Kong, environmental compliance for the textile industry 176
water pollution control policy 216

Instrumental evaluation, of whiteness 263

Jet dyeing, influence of liquor ratio on the jet dyeing of cellulose fibres using different types of monochlorotriazine reactive dyes 19

Keratin, wool, photolytic production of chromophores and fluorescence 345
reaction with tetrazonium cations 77

Leather, simultaneous multiwavelength spectrophotometric determination of 1:2 metal-complex dyes 199

Letters, BS 1006 review 115

Indexes 248

Keeping up standards 114

PCP (pentachlorophenol) 249

Upbeat education 249

Light-fastness, CI Acid Red, effect of polycation 249 311
crystal violet lactone, novel approach to improve 323

testing, a novel approach 220

Liposomes, phosphatidylcholine/cholesterol, as vehicles for anthraquinone disperse dyes in wool dyeing 30

Liquid ammonia, dyeing properties of cotton fibres following treatment 154

Liquor ratio, influence on jet dyeing of cellulose fibres 19

Low temperature ultrasonic dyeing, of silk 342

Lustre, of wool fibres, enhanced by enzymatic descaling 352

Maillard reaction, effect on dye pick-up of wool 293

Membrane systems, for waste water treatment 179

Merlin Dyeing and Finishing 58

Metal, ions, transition, chelates of chromotropic acid-derived disazo dyes for polyester dyeing 349
salts and mordanted dyes, protection against phototendering of wool 103

Metal-complex dyes for leather, simultaneous multiwavelength spectrophotometric determination 199

Methacrylamide, for modification of wild silk fibres 382

Moisture content, of wool, influence on colour appearance after dyeing 285

Monazo anionic dyes from 5-acetamidoaniline-2-sulphonic acid and 1-naphthylamine, a comparative study (Substitutes for 1-naphthylamine, Part 1) 390

Monochlorotriazine reactive dyes, influence of liquor ratio on jet dyeing of cellulose fibres 19

Mordanted dyes, and metal salts, protection against phototendering of wool 103

Mordants, anionic trivalent chromium complexes as mordants in chrome dyeing 316

with metal salts – protection against phototendering of wool 103

Multiwavelength spectrophotometric determination, simultaneous, of 1:2 metal-complex dyes for leather 199

New technology 2, 54, 89, 126, 169, 170, 210, 258, 305

Norwich, shawl industry 275

Notice to authors of papers 37

Nucleophilic aminoalkyl dyes for level fast dyeing of wool, with bifunctional crosslinking agents 385
with trifunctional crosslinking agents 12

Obituary, Francis Malcolm Stevenson 360
Oil-soluble azo dyes, for silver dye-bleach photography 190

On-line colorimetry, in continuous dyeing 139

Orange pigments, X-ray powder data 26

Pentachlorophenol (letter) 249

Phosphatidylcholine/cholesterol liposomes, as vehicles for anthraquinone disperse dyes in wool dyeing 30

Photolytic production, of chromophores and fluorescence in wool keratin 345

Photography, silver dye-bleach using oil-soluble azo dyes 190

Phototendering of wool, protection by metal salts and mordanted dyes 103

Pigments, and the artist's palette 368
orange – X-ray powder data 26

Plasticisation, of acrylic fibres 328

Polyester and its blends, dyeing with some disazo dyes derived from the disodium salt of chromotropic acid and their chelates with transition metal ions 349

Polypropylene fibres, coloration with acid dyes 159

Printing, cellulose 4
environmental considerations 7
reactive dye 4
textile printing products 7

Process optimisation, in the exhaust dyeing of cellulose 135

Stuart S Smith 185

Publications, Identification of papermaking fibres 307
Raw materials for pigments 258
Safety management systems 3
Textile companies – who will survive? 211

Pyrazolone, derived azo colorants 66

Raw mulberry silk, partial degumming 245

Reactive dyes, analysis by thin layer chromatography 100
application to cotton by a wet-on-wet cold pad-batch method 187
haloacetyl – synthesis and application to silk 195
models for chemical selectivity on cotton 288
monochlorotriazine – influence of liquor ratio on jet dyeing of cellulose fibres 19
release from wool fibres by alkaline hydrolysis and analysis by thin layer chromatography 100

Reflectance measurements, on wool 285

Shrink resistance, of wool pretreated by fluorination 63

Silk, dyeing with sulphotoethylsulphone dyes – a new approach 146
haloacetyl reactive dyes 195

low temperature ultrasonic dyeing 342
modification of wild silk fibres with methacrylamide 382
raw mulberry, partial degumming 245
Silver dye-bleach photography, using oil-soluble azo dyes 190

Simultaneous multiwavelength spectrophotometric determination, of 1:2 metal-complex dyes for leather 199

Society of Dyers and Colourists, annual dinner and AGM 1995 226
annual presentation 186
council 1995/96 256
description of 36
international conference 1994 1
notice to authors of papers 37
report of the examinations board (1994) 39
role in a changing world 227

Sodium sulphite, and cationic protein hydrolysate – effect on wool 281

Sol-gel coloured coating, for the coloration of glass 150

Spectrophotometric determination, simultaneous multiwavelength, of 1:2 metal-complex dyes for leather 199

Spectroscopy, Fourier transform infra-red (FTIR), to investigate modifications to wool treated with sodium sulphite and cationic protein hydrolysate 281

Sputter etching, colour change of dyed aramid fabrics 111
effect on the surface characteristics of dyed aramid fabrics 72

Sulphatoethylsulphone dyes, new approach to the dyeing of silk 146

Sulphur dyes, and the environment 172

Standards, BS 1006 review (letter) 115
BS EN ISO 9000, help or hindrance in a small textile company? 223
Keeping up standards (letter) 114

Synthetic textured yarn, market set for global growth 224

Tetrazonium cations, reaction with wool keratin 77

Textiles, BS EN ISO 9000 in a small company 223
Chinese industry – threat or investment opportunity 98
consumer, satisfying the 212
Hong Kong industry – environmental compliance 176
printing products, environmental considerations 7

Textured yarn, synthetic, market set for global growth 224

Thermal characterisation, of acrylic fibres 328

Thin layer chromatography, to analyse release of reactive dyes from wool fibres by alkaline hydrolysis 100

Transition metal ions, chelates of chromotropic acid-derived disazo dyes for polyester dyeing 349

Ultrasonic dyeing, low temperature, of silk 342

Ultrasonic energy, in reactive dyeing of cellulose 279

Video camera, for colour measurement 373

- Vinyl monomers**, effects of graft polymerisation to wool 80
- Virtual** colour specification 260
- Waste water treatment**, choosing the right membrane system 179
Hong Kong, water pollution control policy 216
- Wet-on-wet** cold pad-batch method, for application of reactive dyes to cotton 187
- Whiteness**, instrumental evaluation of 263
- Wool**, Basolan AS dyeing process 228
effects of amino acid dissociation constants on the rate of dyeing with CI Acid Violet 48 22
enzymatic descaling to produce fibres of enhanced lustre 352
FTIR analysis after sodium sulphite and cationic protein hydrolysate treatment 281
graft polymerisation of vinyl monomers to wool 80
increased dye pick-up, due to the Maillard reaction 293
influence of moisture content on colour appearance after dyeing 285
level fast dyeing with nucleophilic aminoalkyl dyes and crosslinking agents 12, 385
phosphatidylcholine/cholesterol liposomes as vehicles for anthraquinone disperse dyes 30
photolytic production of chromophores and fluorescence in keratin 345
protection against phototendering by metal salts and mordanted dyes 103
- reaction of keratin with tetrazonium cations 77
release of reactive dyes from fibres by alkaline hydrolysis and analysis by thin layer chromatography 100
shrink resistance by fluorination pretreatment 63
- Wool keratin**, photolytic production of chromophores and fluorescence 345
reaction with tetrazonium cations 77
- X-ray powder data**, for orange pigments 26
- Young Colourist of the Year 1994** 60
